This new and exciting entry-level boot camp is deemed to be the most popular accelerated Cisco certification course. The CCENT (Cisco Certified Entry Networking Technician) certification validates the skills required for entry-level network support positions, the starting point for many successful careers in networking. Candidates should have the knowledge and skill to install, operate and troubleshoot a small enterprise branch network, including basic network security. CCENT certification is the first step toward achieving CCNA certification, which covers medium-size enterprise branch networks with more complex connections.
