

The CCBOOTCAMP CCIE Voice Lab Prep 1-2-3 Package includes:

- (1) CCIE Voice Technology Lab Workbook, CCIE Voice Advanced Lab Workbooks, Volume One and Two
- (2) CCIE Voice Virtual Racks (10 Sessions)
- (3) CCIE Voice 5-Day Instructor-Led Advanced Lab Boot Camp

CCIE Voice Technology Lab Workbook

This 300+ page CCIE Voice Technology Lab Workbook is written specifically to give students an in-depth understanding of the core technologies on the CCIE Voice lab exam. The technology workbook breaks down all major topics into their own chapter, and covers each topic with lab scenarios and well-documented solutions, including explanations and screen shots. The workbook includes the following sections: Basic Campus Design; Call Manager and Call Manager Express; Voice Gateway and Signaling; Call Routing; Voice Codec; Call Admission Control; High Availability Features; Media Resource Management; QOS; Unified Messaging; CRS/IPCC; Express; Call Manager Voice Applications; Supplementary Services; Directory Services and Integration; Fax; and one eight-hour practice lab. For additional information, please visit: <http://www.ccbootcamp.com/ccievoicelw-tech.html>

CCIE Voice Advanced Lab Workbooks, Volume One and Two

The CCIE Voice Advanced Lab Workbooks, Volume One and Two, are written specifically to prepare students for the CCIE Voice lab exam. There are five full eight-hour mock labs in each workbook (10 labs total) with complete walk-throughs and explanations. For additional information, please visit: <http://www.ccbootcamp.com/ccievoicelw.html>

CCIE Voice Virtual Racks

CCBOOTCAMP has spent over \$5.5M (Cisco list price) on the most advanced Voice training racks in the Cisco training industry. CCBOOTCAMP training racks are loaded with the latest Cisco gear, including (but not limited to): two (2) Cisco 2811s running 12.4 (HQ, Branch 1); one (1) Cisco 3725 running 12.4 (Branch 2); one (1) Cisco Catalyst 3560 w/ POE running EMI code; seven (7) Cisco 7960G IP Phones; one (1) Catalyst 6503 with Sup2/MFC2/PFC2,6608-T1,6348-RJ45V; one (1) VG248; one (1) Server w/Call Manager 4.1(3) Pub and IPCC Express; one (1) Server w/ Unity 4.0(5); one (1) Cisco 2811 for PSTN/WAN cloud; one (1) 1 NM-CUE (Cisco Unity Express Network Module); one (1) Server with Call Manager 4.1(3) Subscriber; and one (1) PIX 501 firewall to allow VPN access into the rack. These racks are used for instructor-led classroom training and are also available for remote rack rental. Enrollment in the Voice program includes 10 rack sessions, each lasting six hours in duration. For additional information, please visit: <http://rackreserve.ccbootcamp.com/>

CCIE Voice 5-Day Instructor-Led Advanced Lab Boot Camp

CCIE advanced lab boot camps are where CCBOOTCAMP students focus on the integration of core topics along with other advanced technologies. The CCIE Voice Five-Day Instructor-Led Boot Camp is geared towards CCIE candidates who already have a strong, in-depth understanding of the inter-workings of the required core topics. Students should be able to easily complete technology focused labs, advanced labs, and have their lab exam scheduled within 30 to 45 days of the advanced lab boot camp. Classes are taught from 9am - 8pm Monday through Thursday, and 9am - 5pm on Friday, and are also available for access via CCBOOTCAMP's online training classroom (remote boot camp option). For additional information, please visit: <http://www.ccbootcamp.com/ccievoicelb.html>
